

SITERA^{plus} Dispatcher:

SITERA^{plus} dispatcher offers a complete office solution that reinforces the position of the SITERA^{plus} technology as the highest level of professional communication. The command center and control solution of SITERA^{plus} offers potent and flexible functions. SITERA^{plus} dispatcher can be deployed as a desktop application, or it can work in mobile environments. It has an easy and intuitive installation process and can be configured in a wide range of computers with Windows in a matter of minutes.

PoC voice calls (PTT over Celular):

This is the core functionality of any two way radio system. Push-to-Talk (PTT) allows a single person to communicate with hundreds of users, organized in groups, with the push of a button. SITERA^{plus} supports PTT group calls over high-speed IP networks and provides excellent audio quality.

Text messages:

The application allows real time exchange of text messages freely between individual users or groups. The recipient of the message receives an instant notification.

Flexible configuration:

From the fleet configuration screen, the administrator can manage:

- Users, groups and fleet labels.
- Activate/Deactivate each user individually.
- Define which users participate in each group.

Additional functions:

In addition to the voice communication capacities, sending data allows to:

- Give Location.
- Sending and receiving alerts and alarms.
- Sending and receiving telemetry data (Refrigerator temperatures data, doors opening data,...).
- Sending of RFID Tags codes.
